Office Action Summary	Application No. 10/688,793	Applicant(s) BRIANT ET AL.	
	Examiner Marie Patterson	Art Unit 3728	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-13, and 15-18 are rejected under the judicially created doctrine of double patenting over claims 1-21 of U. S. Patent No. 6,748,677 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: both claim soles or methods of providing the sole elements comprising a receptacle with locking means, cavity elements, and a stud with cooperating locking means as claimed.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See MPEP § 804.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 5-9, and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Swindle (6050006).

Swindle shows a shoe with a stud base/sole (12), a receptacle (14) with a first locking means (34) and a stud (18) with an oblong locking member (24, column 3 line 47) as claimed.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-13, 15, 17, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Korsen (5638615) in view of either Swindle, Pierce (2192150), or Sullivan (1970254).

Korsen shows a shoe with a receptacle (211) with a first locking means (223) and a stud (229) with a second locking means (223) on a fastening projection (230) substantially as claimed except for the exact shape of the fastening projection. Either Swindle, Pierce, or Sullivan teaches the use of oblong as well as other shapes for a

fastening projection. It would have been obvious to shape the projection as oblong as taught by either Swindle, Pierce, or Sullivan in the shoe of Korsen to provide a more stable connection that won't easily rotate during use.

In reference to claims 3, 4, and 18, the use of injection molding is extremely well known and conventional method for molding plastic elements in the art of footwear and it would have been obvious to form any of the molded plastic elements in the shoe of Korsen as modified above by injection molding to make the elements easier and faster to manufacture.

In reference to claim 11, see figure 10 of Korsen.

7. It is noted that the foreign priority document 10118986 has been received in prior application 10/125057. However foreign priority document 10248482 has not been received in the office.

1. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
